EDUCATION

SAVITRIBAI PHULE PUNE UNIVERSITY   *Sept 2017 - July 2021*
Bachelor of Engineering in Electronics And Telecommunication
CGPA: 7.31

PROJECTS

Cinemax: A Movie Search Web App
React Js Developer
— **Live Demo** | **Github Repo**
— Effectively managed the application's state on the client side using **Redux** with **redux-toolkit** to enhance development efficiency.
— Incorporated modern React features using **React Hooks** .Implemented a **custom React Hook** to streamline code and reduce redundancy. Utilized **React Router** for efficient routing within the application.
— Executed various application features by handling asynchronous **API** requests,employing **Axios**—a promise-based HTTP client compatible with both browsers and Node.js environments.
— Created page layouts efficiently using **SASS**, a **CSS preprocessor**, to organize code systematically.
— **Browser Testing** and **Debugging Tools Utilization**:Implemented **React DevTools** and **Redux DevTools** for streamlined debugging, inspecting React components and tracing state changes, fostering an efficient development workflow.

Portfolio Website
Frontend Developer
— **Live Demo** | **Github Repo**
— Crafted dark and light themes functionalities using **JavaScript** and **ES6** features such as let, const, and arrow functions.
— Created page layouts efficiently through **CSS flexbox** and **grid** techniques.
— Incorporated **UI/UX practices** to meet project requirements and create a compelling presentation of my work.
— Ensured compatibility and **responsiveness** across devices and browsers.

Grilli:Landing Page of a Restaurant Website
Frontend Developer
— **Live Demo** | **Github Repo**
— Performed key front-end technologies such as **HTML**, **CSS**, and **JavaScript** to create visually appealing and interactive user interfaces. Seamlessly integrated **CSS animations** to enhance user engagement , mastering CSS animations features. Leveraged **JavaScript** for precise **DOM manipulation**,employing native methods to dynamically update and enhance the web page's interactivity.

Todo App
React Js Developer
— **Live Demo** | **Github Repo**
— Developed a ToDo app using **React.js**. Utilized **React Hooks**, including **useState**, for efficient CRUD operations. Incorporated **Filter** and **Map methods** for streamlined data handling.
— Utilized **V4 UUID** for generating unique IDs for each task. Explored and learned **React life cycle methods** during the development process.

CERTIFICATIONS

Java Full Stack Development | Envision Computer Training Institute,Pune   *Nov 2022 - May-2023*

SKILLS

— HTML
— CSS
— JavaScript
— React.Js
— Redux
— BootStrap / Material UI
— Java
— Database : MySQL
— GitHub
— Data Structures and Algorithms
— OOPS Concepts
— API Integration
